

2018 International Conference on Resilience Development and Innovation in Asia

Taipei Medical University (TMU)
Taiwan-Asia Exchange Foundation (TAEF)
Pan-Asia Risk and Insurance Management Association (PARIMA)

You are Invited-

2018 International Conference on Resilience Development and Innovation in Asia

Surprisingly, advances in technology and economic development have increased the intensity of the world's hazards. Natural disasters, man-made disasters, financial mismanagement, and new IT threats, to name a few, appear more frequently and with increasing severity. Resilience, in many forms, has become an important topic within the fields that support disaster preparation and response. It brings many useful and usable ideas.

Resilience brings many useful ideas as it touches on a diversity of concepts, techniques and measures. Resilience is a continuing process to be integrated into all facets of life and organizations. It also highlights risks where sources of resilient performance can be lost or undermined as economic or other pressures dominate.

This conference brings together international experts in building resilient processes and organizations. They will present key ideas about how to build resilience, new threats from an increasingly complex world, and practical cases of resilience in action. The conference will provide information on how to build a more resilient organizations and infrastructures to cope with everyday surprises and sudden disasters.

We cordially invite you to join us, please mark your date and register now.

When:

Monday, November 5, 2018,
9:00-17:00

Check-in:

8:30-9:00

Where:

4F Conference Hall, United
Medical Building (Front Building),
Taipei Medical University
250 Wuxing St. Taipei 11031

**Free Registration by
November 2, 2018**
